CONTENTS OF VOLUME 68

Nos. 1,2 **May 1993**

Preface
D.R. Mattie, D.E. Dodd and H.J. Clewell III 1

Introduction
D.R. Mattie, D.E. Dodd and H.J. Clewell III 3

Welcome Address
E.K. Vermulen 5

Session I: Health Assessment of Halon Replacements

Overview – Air Force policy on halons
E.T. Morehouse, Jr. (USA) 11
Human health and environmental toxicity issues for evaluation of halon replacements
R. Rubenstein (USA) 21
Industrial research on alternative fluorocarbons
H.J. Trochimowicz (USA) 25
Air Force approach to risk assessment for Halon replacements
J.N. McDougal and D.E. Dodd (USA) 31
Metabolism and pharmacokinetics of selected Halon replacement candidates
D.E. Dodd, W.T. Brashear and A. Vinegar (USA) 37

Session II: Alternatives to Animals in Toxicology Research: Policy Considerations

Animal issues and society
J.H. Grabau (USA) 51
Current DoD policy on use of animals in research
J.W. Kolmer (USA) 59
Formulation of ethical standards for use of animals in medical research
A.N. Rowan (USA) 63
In vitro models for toxicological research and testing
J.M. Frazier (USA) 73
In vitro methodologies for enhanced toxicity testing
N.J. DelRaso (USA) 91
Coupling of computer modeling with in vitro methodologies to reduce animal usage in toxicity testing
H.J. Clewell III (USA) 101
Regulatory agency considerations and requirements for validation of toxicity test alternatives
S. Green (USA) 119

Session III: Applications of Pharmacokinetics in Risk Assessment

Estimating the risks of liver and lung cancer in humans exposed to trichloroethylene using a physiological model
J.W. Fisher (USA) 127

Variability of physiologically based pharmacokinetic (PBPK) model parameters and their effects on PBPK model predictions in a risk assessment for perchloroethylene (PCE)
J.M. Gearhart, D.A. Mahle, R.J. Greene, C.S. Seckel, C.D. Flemming, J.W. Fisher and H.J. Clewell III (USA) 131
A pharmacokinetic model for chromium
E.J. O'Flaherty (USA) 145
Limiting the uncertainty in risk assessment by the development of physiologically based pharmacokinetic and pharmacodynamic models
C.B. Frederick (USA) 159
Dioxin hepatic carcinogenesis: Biologically motivated modeling and risk assessment
J.J. Mills and M.E. Andersen (USA) 177

Session IV: Selected Mechanisms in Carcinogenicity
Peroxisome proliferators: Paradigms and prospects
G.G. Gibson (UK) 193
The role of dichloroacetate in the hepatocarcinogenicity of trichloroethylene
R.J. Bull, M. Templin, J.L. Larson and D.K. Stevens (USA) 203
Application of kinetic models to estimate transit time through cell cycle compartments
S.R. Channel and B.L. Hancock (USA) 213

Session V: Advances in the Assessments of Toxicological End Points

Developmental toxicity, reproductive toxicity, and neurotoxicity as regulatory endpoints
S.B. McMaster (USA) 225
Neurobehavioral methods used in neurotoxicological research
H.A. Tilson (USA) 231
Use of alternative endpoints with the UPitt II method for assessing the toxicity of smoke
D.J. Caldwell (USA) 241
Ozone- and endotoxin-induced mucous cell metaplasias in rat airway epithelium: Novel animal models to study toxicant-induced epithelial transformation in airways
J.R. Harkema and J.A. Hotchkiss (USA) 251

Notes to Authors 265

Announcement from the Publisher 266

No. 3 **June 1993**

Effects of 2,4-dichlorophenoxyacetic acid on *Rhizobium* sp. growth and characterization of its transport
R.N. Arias and A.F. de Peretti (Argentina) 267
Glutathione-dependent biotransformation of methyl parathion by mouse liver in vitro
Y.-S. Huang and L.G. Sultatos (USA) 275
Caffeine does not increase synthesis of heat shock proteins in rat embryos
J.M. Wilkinson, I. Pollard, D.A. Walsh, R.G. Hiller and K. Li (Australia) 285
Influence of chronic intoxication with selenium on collagen and elastin content in tissues of rat
E.J. Kucharz and K. Olczyk (Poland) 295
Effect of mancozeb on hepatic glutathione *S*-transferase in rat
A. Siddiqui, B. Ali and S.P. Srivastava (India) 301
Evidence that mercury from silver dental fillings may be an etiological factor in smoking
R.L. Siblerud, E. Kienholz and J. Motl (USA) 307

Effects of perinatal exposure to specific PCB congeners on thyroid hormone concentrations and thyroid histology in the rat
D.K. Ness, S.L. Schantz, J. Moshtaghian and L.G. Hansen (USA) 311
Formation of methemoglobin by 3-chloro-4-(dichloromethyl)-5-hydroxy-2(5H)- furanone, MX, in rat erythrocytes in vitro
L. Risto, T. Vartiainen and H. Komulainen (Finland) 325

Author Index Vol. 68 333
Subject Index Vol. 68 335
Contents of Volume 68 337
